

# COUNTY PROFILE: Lee County, North Carolina

## US COUNTY PERFORMANCE

The Institute for Health Metrics and Evaluation (IHME) at the University of Washington analyzed the performance of all 3,142 US counties or county-equivalents in terms of life expectancy at birth, mortality rates for select causes, alcohol use, smoking prevalence, obesity prevalence, and recommended physical activity using novel small area estimation techniques and the most up-to-date county-level information.

Explore more results using the interactive US Health Map data visualization (<http://vizhub.healthdata.org/subnational/usa>).

## FINDINGS: LIFE EXPECTANCY

| Sex    | Lee County | North Carolina | National | National rank | % change 1980-2014 |
|--------|------------|----------------|----------|---------------|--------------------|
| Female | 80.0       | 80.2           | 81.5     | 1732          | +5.6               |
| Male   | 73.8       | 75.4           | 76.7     | 2281          | +10.8              |

life expectancy at birth (years), 2014
